WORK EXPERIENCE

Software Engineer (Full Stack)

Sept 2023 – Present

ABC Pvt Ltd.

Gujarat

- **Spearheaded the end-to-end development** of a onboarding platform on **AWS EC2** using **Next.js 14** and **Node.js (TypeScript)**, collaborating with stakeholders to define scalable system requirements.
- **Architected and delivered the MATS tracking system**, a full-stack enterprise solution using **Next.js (SSR)** and **Node.js/TypeScript** to handle 10k+ records with sub-200ms response times.
- **Pioneered the Vendor Management System (VMS)**, a full-stack application built with **Node.js** integrated with **SAP** via APIs to automate procurement lifecycles and ensure 100% data synchronization.
- **Streamlined database performance by 80%** by refactoring legacy PostgreSQL stored procedures and implementing covering indexes within an **Agile** development environment.
- **Orchestrated global asset delivery** via **AWS CloudFront (CDN)** and S3, achieving a 60% reduction in page load times and optimizing Core Web Vitals for the e-IFU portal.
- **Accelerated release velocity** by establishing CI/CD pipelines in **GitHub Actions**, reducing deployment overhead and ensuring environment parity across cloud instances.

Full Stack Developer Intern

Jan 2023 – Mar 2023

ABC

Gujarat

- **Modernized 10+ RESTful APIs** in a Node.js/Express environment, handling 5,000+ daily requests through optimized middleware and routing patterns.
- **Eliminated 20% of technical debt** by leading the refactor of legacy JavaScript modules into Type-safe TypeScript components.
- **Engineered MongoDB schemas** and compound indexes to support 50,000+ records, ensuring high availability and system stability.

TECHNICAL PROJECTS

Distributed Task Automation Engine (Node.js, TypeScript, BullMQ, Redis, React)

[Github](#)

- **Backend:** Built a high-concurrency scheduler using **Clean Architecture** to decouple core business logic from **Redis/BullMQ** infrastructure.
- **Infrastructure:** Implemented **exactly-once processing** guarantees using Redlock-based coordination and visibility timeouts to prevent data loss during worker failures.
- **Frontend:** Developed a real-time observability dashboard in React to monitor worker heartbeats and task throughput via Socket.io.

Microservices E-Commerce Ecosystem (Node.js, Kafka, Redis, PostgreSQL, Elasticsearch)

[Github](#)

- **Architecture:** Designed a decoupled system using **Event-Driven Architecture (Kafka)** to maintain eventual consistency across Catalog, Order, and Payment services.
- **Optimization:** Integrated **Elasticsearch** for sub-100ms product search and implemented Redis-based API rate-limiting to ensure system stability.

TECHNICAL SKILLS

- **Frontend:** React 19, Next.js (App Router/SSR), TypeScript, Tailwind CSS, TanStack Query, Zustand.
- **Backend:** ASP.NET Core 8, Node.js, Express.js, **Clean Architecture**, BullMQ, REST APIs, JWT.
- **Cloud & DevOps:** **AWS (EC2, S3, RDS)**, Docker, GitHub Actions, Linux (Ubuntu), Apache Kafka.
- **Databases:** PostgreSQL, MongoDB, **Redis Streams**, Elasticsearch.

EDUCATION

Bachelor of Engineering (Information Technology)

2019 – 2023

Tier 3 College of Engineering and Technology

CGPA: 8.09 / 10.0
